MD. MUSFIQUR RAHMAN

Junior Full-Stack Developer (MERN)

Rajshahi, Bangladesh | musfik070@gmail.com | linkedin.com/in/md-musfiqur-rahman7 | github.com/musfik070-gif

PROFESSIONAL SUMMARY

CSE graduate (CGPA 3.86/4.00) building full-stack web apps with React, Next.js, Node.js, Express and MongoDB. Delivered three deployed projects with role-based dashboards, Stripe payments and JWT/OAuth authentication. Also completed a Python machine learning thesis and co-authored a conference paper.

CORE SKILLS

Frontend: JavaScript, React, Next.js, Tailwind CSS, DaisyUI, Framer Motion, React Router, HTML5, CSS3
Backend: Node.js, Express.js, REST APIs, JWT, Better Auth, Google OAuth, Stripe
Database: MongoDB, MongoDB Atlas
Machine Learning: Python, scikit-learn, pandas, NumPy, imbalanced-learn, Matplotlib
Tools: Git, GitHub, Vite, Vercel, Render, ESLint, LaTeX

PROJECTS

MediCare Connect | Next.js, React, Express, MongoDB, Stripe, Better Auth | Live | GitHub

- Delivered a telehealth platform with 3 role-based dashboards (patient, doctor, admin) by building protected routes that check JWT tokens and user roles.
- Enabled online appointment payments by integrating Stripe Checkout into the patient booking flow.
- Implemented email/password and Google OAuth sign-in with Better Auth, connected to an Express REST API on Render and a MongoDB database.

IdeaVault | React, Vite, Node.js, Express, MongoDB Atlas, JWT | Live | GitHub

- Built a MERN platform for sharing startup ideas, with full create/edit/delete for ideas and comments, plus search, category filter and sorting by date and budget.
- Secured private routes (idea details, my ideas, comments) using JWT authentication and Bcrypt password hashing.
- Deployed the client on Vercel with a dark/light theme and a responsive mobile layout.

Hisabghor | HTML, CSS, JavaScript, Google Analytics | Live | GitHub

- Launched 3 free Bengali browser tools (Bangla date converter, land measurement converter, SSC/HSC GPA calculator) that need no sign-up or installation.
- Made the site discoverable by adding sitemap.xml, robots.txt and Google Analytics, and connecting a custom domain.

Early Detection of Gestational Diabetes Using Machine Learning (BSc Thesis, 2026) | Python, scikit-learn, imbalanced-learn, pandas

- Benchmarked 5 classifiers (Logistic Regression, Random Forest, AdaBoost, SVM, k-NN) on two datasets of 23,490 and 3,525 records using stratified 5-fold cross-validation.
- Prevented data leakage by excluding 29 unsuitable columns, selecting 15 predictors with mRMR and applying SMOTENC only inside training folds.
- Reported a leakage-free ROC-AUC of 0.65 on the larger dataset; built the pipeline and ran the feature-selection and cross-validation experiments in a team of three.

PUBLICATION

Analysis of Lung Cancer Risk Associated with Long-Term Smoking Using Machine Learning Approaches - second author, accepted at UCICS 2026 (Varendra University)

EDUCATION

B.Sc. in Computer Science and Engineering, Varendra University, Rajshahi | 2026 | CGPA 3.86/4.00
Higher Secondary Certificate (HSC), New Govt. Degree College, Rajshahi | 2020 | GPA 5.00
Secondary School Certificate (SSC), Govt. Laboratory High School, Rajshahi | 2018 | GPA 5.00
